

CUHK-Coral Workshop

Hands-on
experience in coral
restoration

Organized by CUHK and AFCD, the "Coral Nursery Education Program" is a profound coral conservation program for local high school students. Through a series of workshops and field trips, students can learn about Hong Kong's rich marine ecology and promote conservation.

Water Checking Workshop

Students can learn about how water parameters can affect the growth of coral, and how to monitor the water quality.

To enhance students' awareness of the local marine ecology and coral restoration.

Coral Ecology Seminar

Coral Restoration Experience ★

VR360 Reef-Check Workshop 📺

Students who participate in this program can take part in coral restoration – coral cultivation and continuous monitoring of coral fragments. They can experience the frontline work of marine conservation, raising their awareness and concern about environmental protection.
